

25 Auto Cartridge

25 Auto Cartridge

Designed by John Browning in 1905. The use of the .25 ACP allows for a very compact lightweight gun. This cartridge is relatively short ranged and low powered. The .25 ACP is viewed by some as a choice for personal defense handguns due to its center firecase-design, which is inherently more reliable than a rimfire cartridge.

Drawn from premium American-made brass cups, these casing are rigorously tested to ensure unparalleled durability and dependability, each casing undergoes rigorous in-line and post-production quality assurance testing to ensure a flawless casing.

Standard casing dimensions and tolerances have been modified to achieve maximum performance. Jagemann™ Sporting Group's in-house tooling and engineering capabilities provide the ability to customize casing dimensions for use with specific projectiles. We can meet your needs.

SAAMI Specifications:

Type	Pistol
Date of Origin	1905
Designer	John Browning
Case Type	Semi-rimmed, straight
Neck Diameter	.276 in (7.0 mm)
Base Diameter	.278 in (7.1 mm)
Rim Diameter	.302 in (7.7 mm)
Rim Thickness	.043 in (1.1 mm)
Case Length	.615 in (15.6 mm)
