# .40 S&W Cartridge

The .40 caliber cartridge is a popular choice amongst U.S. Federal and State law enforcement agencies. Featuring a straight, rimless design, the .40 caliber accommodates a wide range of semi-automatic handguns. Dimensionally smaller than the .45, this casing delivers exceptional power with minimized recoil.

Standard casing dimensions and tolerances have been modified to achieve maximum performance. Our in-house tooling and engineering capabilities provide the ability to customize casing dimensions for use with specific projectiles. Each .40 caliber cartridge is drawn from American-made premium brass and manufactured exclusively at Jagemann™ Sporting Group.

Rigorous in-line and post-production quality assurance testing ensures a flawless casing of unparalleled durability and dependability.
