.38 Super Cartridge

The Super was introduced in the 1920's as a higher pressure loading of the .38 ACP or .38 Auto. The .38 Super has gained popularity among many top pistol match competitors. The .38 Super has a reputation as a well-balanced cartridge with a flat trajectory, good accuracy and relatively high muzzle energy; most loading have greater muzzle energy than many factory-loaded .45 ACP loadings.

Drawn from premium American-made brass cups, these casing are rigorously tested to ensure unparalleled durability and dependability, each casing undergoes rigorous in-line and post-production quality assurance testing to ensure a flawless casing.

Standard casing dimensions and tolerances have been modified to achieve maximum performance. Jagemann Sporting Group's in-house tooling and engineering capabilities provide the ability to customize casing dimensions for use with specific projectiles. We can meet your needs.

SAAMI and CIP Specifications:

Type	Pistol
Date of Origin	1929
Case Type	Rimless
Neck Diameter	.384 in (9.75 mm)
Base Diameter	.384 in (9.75 mm)
Rim Diameter	.406 in (10.31 mm)
Rim Thickness	.050 in (1.27 mm)
Case Length	.900 in (22.86 mm)
Primer Type	Small Pistol
Max Pressure	38,500 psi (251.66 MPa)
